

Drawing Submissions — DT Guide

How to submit drawings for DM review, and what happens to them afterwards. September 2026.

1. Where to upload

Upload every submission — all stages — to the project's Pending folder:

Drawing Submissions / {Project No} / 01_Pending /

- One drawing per PDF. PDFs only.
- Put files directly in **01_Pending** — no subfolders, and not in any of the other numbered folders.
- New uploads are picked up at **08:00, 12:00, 16:00 and 20:00**. Once uploaded, don't rename, move or overwrite the file.

2. Filename protocol

{Item}_{Stage}_{Rev}_{DrawingNo}_{Initials}.pdf

e.g. 003_S4_P01_EIT-TMJ-AA-B2-D-I-45120_GF.pdf

Section	What to enter	Example
Item	The item (Suffix) number, 3 digits	003
Stage	S3, S4, S5, A4.5 or AB — see the table below	S4
Rev	Drawing revision	P01, C01
DrawingNo	The full drawing number, exactly as in the drawing register. Hyphens only.	EIT-TMJ-AA-B2-D-I-45120
Initials	Your initials, 2–4 letters (first letter of each name). This records you as the DT in Notion.	GF

- Use underscores **only** between the five sections — never inside the drawing number.
- No spaces and no extra words ("final", "rev", "(1)", "copy" etc.).

Stage	Meaning	Stage	Meaning
S3	For Coordination	A4.5	Authorised Mfg. & Constr. Design (C01)
S4	For Review and Authorisation	AB	As Built Record Drawings
S5	For Review and Acceptance		

3. What happens next

Outcome	Where the file goes	What you do
Approved	Moved to 03_Ready For Issue/, name unchanged.	You'll get an email with the Ready For Issue folder link. Upload your DWGs to that folder.
Issued	When the DM issues it, the PDF moves on to 04_Issued/.	No action.
Bounced	The DM's marked-up PDF is moved to 02_Rejected/ with _R1, _R2... added.	Revise to the markup, then upload the revised PDF to 01_Pending using the filename protocol.
Client grade S4 / S5	Client comments reviewed by the DM are in 05_Client Comments/Reviewed/ — files start R_.	Follow the action and date in the grade email.
C01 rejected (A4.5)	Moved to 05_Client Comments/ with the grade and date added, e.g. 003_A4.5_C01_..._Rejected_260910.pdf	Revise to the returned comments and resubmit to 01_Pending.
C01 approved (A4.5)	Moved to 06_Signed Off/, name unchanged.	Proceed with production.

Folders are inside each project folder. Approve and bounce emails are sent in batches by the DM, so allow some time after review.

4. Why a file might not be picked up

- Initials missing from the end of the filename
- Stage not one of S3 / S4 / S5 / A4.5 / AB, or sections in the wrong order
- Spaces or underscores inside the drawing number
- A duplicate copy, e.g. "... (1).pdf" or "*conflicted copy*"
- Saved in a subfolder, or in the wrong project's folder

If your drawing hasn't appeared by the next pickup, check the filename against section 2 and let the DM know.
